WORK EXPERIENCE

Software Engineer

Cybage Software Pvt. Ltd

07/2018 - Present Client : US (Healthcare Domain) Pune

Achievements/Tasks

- Reduced the average read latency by 85% by transitioning the Windows-Form based application into a Modern Web-based SAAS application (ReactJS(16.x), .NET Core API 2.2).
- Engineered captivating UI dashboard and widgets (Recharts) to showcase financial data insights of 230-250 healthcare institutes.
- Improved the client user-experience to effortlessly analyze the financial healthcare data using a sleek dashboard. (Material UI)
- Attenuated the security threats by successfully implementing enhancements using Secrets Management System. (REST API & MS SOL Server).
- Efficiently streamlined the backend pipeline using ETL operations (MS SQL Server).
- Collaborated with a team of experienced BI and .NET developers and exercised due Agile process in product development.
- Proactively supported resolution of high priority issues of PROD environment without any SLA breach.
- Actively participated in gathering requirements, solution design and application demos for the client.

PERSONAL PROJECTS

Chat Application (02/2020 - 04/2020)

 A web-based Slack-like chat application developed using ReactJs, Material UI and Firebase. The application allows users to create channels, have discussions and send text messages as well as images to each other. Gitlab: https://gitlab.com/virtualghostmck/chat-app

Online Assessment System (10/2018 - 12/2018)

 A web-based application which facilitates students to opt for a course of their choice and undergo online assessment exams. The application also provides insights based on the progress throughout the exams by means of charts. The use of OAuth 2.0 authentication is demonstrated in the app. Technology stack: React - Redux, ASP.NET Web API, MS SQL Server

Photography Portfolio Website (04/2020 - Present)

 Photography Portfolio Website built using React JS and styled with Bootstrap. Demonstrates lazy loading of images and components. CICD pipeline setup is made using firebase for Gitlab. Repository: https://gitlab.com/photography-portfolio/photography-portfolio-site
